

FINAL HOLTER REPORT

Date of recording:	6-5-2019	Client:	Julian	Patient:	Zoe
NCSU Patient ID#	217735	Medications:	None		
Breed:	Boxer				
Sex:	F				
Age:	3y	History:	None		
Weight:	60 lbs				
Indication for study:	Pre-breeding				
Email:	puppydog352@earthlink.net				

Mode of Analysis:	Confirm	
Hours of analysis completed:	24 hrs	Comments:
Hours of artifact:	0 hrs	
Hours of readable data:	24 hrs	
Quality of recording:	Good	
Total Beats recorded:	139,825	
Heart Rate:	<i>Minimum:</i> 56 bpm	
	<i>Average:</i> 97 bpm	
	<i>Maximum:</i> 189 bpm	
Pauses:	None	
AV Block:	None	
Supraventricular Premature Beats:	3 SVEs	0.0% of total beats
Ventricular Premature Complexes:	1 VPC	0.0% of total beats
	<i>Singles</i>	1
	<i>Bigeminy, Trigeminy</i>	0,0
	<i>Couplets, Triplets</i>	0,0
	<i>RonT, Vtach</i>	None
Grade of Arrhythmia	0	

* Grading scheme:

1=single uniform VPCs, 2= bigeminy, trigeminy, 3= couplets, triplets, 4= RonT, or ventricular tachycardia (4 or more consecutive VPCs).

This is a normal Holter reading for an adult dog. There is no evidence of familial boxer cardiomyopathy at this time.
